Notes

- Admission requirements are subject to change for future intakes. Please watch for updates on the program website linked above.
- A 1.5-unit course (equivalent to 3-4 credits at most institutions) meets for at least 3 hours per week for 13 weeks (one term).
- At UVic, 'upper-level' refers to 300 and/or 400-level courses normally taken in third and fourth year after introductory studies.

Teachable subject area: General Science

Courses completed 10 or more years ago must be reviewed for currency. Currency review required? Yes No

If you have completed science courses (in topics relevant to the BC secondary school science curriculum), but not the requirements specified for a teachable subject area in biology, chemistry or physics, you may be eligible for the general science teachable subject area.

General science cannot be combined with biology, chemistry, or physics teachable subject areas.

(Those admitted with the biology, chemistry, or physics teachable subject area are automatically considered eligible for general science program experiences.)

A general science teacher needs a diverse science background. See the curriculum documents for science 8 – 10 on the BC Ministry of Education's web site.

Due to limited practicum opportunities and program seats, we strongly recommend combining this subject with a second teachable subject other than social studies.
