## Facilities Notice

**Title:** District Energy Plant – Design for Expansion to Arts Buildings

**Location:** Visual Arts, Fine Arts and Phoenix Buildings

**Description:** Facilities Management has initiated a project to investigate existing building mechanical heating systems, and for the design of systems as would be necessary to connect the Arts Buildings to the new District Energy Plant (DEP). Connection to the DEP system would provide heating in a much more efficient and cost effective way. This initiative would result in saving energy, reducing operating costs and reducing greenhouse gases for many years to come.

At this very early stage of the project there will be periodic visits for site survey purposes to the building and surrounding areas from engineers, architects and Facilities Management staff. There should be no disruption or disturbance to the occupants, you just may see some new faces in and around the building.

**Time frame:** July and August, 2017

**Facilities Management contact:** John Tierney, Project Manager
