Facilities Notice

Title: Heating System Shut Down

Location: Cornett Building

Description: Be advised that the Facilities Management Mechanical shop will be making repairs to the main heating system which will result in disruption to the system.

The building will be at normal temperatures before work commences and should maintain a comfortable temperature during the day. It is advised to bring an extra sweater along in case the building temperature gets a little cooler than normal in the early afternoon. Facilities Management will be working to have the heat reinstated as quickly as possible.

Additional note to all staff and students: The use of the handicapped accessible door results in significant heat loss from the building. During the shut-down, people are asked to use the handicapped accessible door only if necessary.

Time frame: Tuesday, February 11, 2014 to Wednesday, February 12, 2014

Facilities Management contact: Resource Coordinators: Karen Jones and Darlene Winter
