

Notes:

1. Advise UVic Facilities Management and Architect of any conflicts between signage locations and existing conditions.
2. Read these drawings in conjunction with Architectural Plans and Signage Specifications and Details.
3. Remove and dispose of all existing signage noted for removal. Strip all doorways of existing signage, file holders, white boards and tack boards. Patch and Paint.
4. Coordinate Graphics for Evacuation plans with UVic Facilities Management prior to installation.
5. Coordinate graphics for Restricted Access signs (N4a and N4b) with UVic Occupational Health and Safety officer.
6. Patch and make good to match existing adjacent surfaces where damage exists or has occurred through the course of work.
7. Ledgeable pictures of hazards for each room to be posted while signage is removed and replaced.
