School of Health Information Science Seminar:

Virtual & Digital Health – Key Drivers & Trends

Speaker:

Neel Majumder

Senior Leader, Office of Virtual Health, Provincial Health Services Authority

FEB 15th on Zoom
12:00PM PT

Virtual Care is no longer just a convenient enhancement to in person care. Provision of healthcare services remotely has become an absolute necessity for patients, clinicians, care teams and health systems alike to deliver accessible, equitable and inclusive healthcare.

The talk will comprise of my experience, insights & lessons learnt on the key drivers of virtual care, areas of promise and opportunity, critical success factors and trends as well as the pitfalls to avoid while designing and implementing digital health solutions. More details are below:

- What is driving the adoption of digital health technology: Digital Front door, telemedicine, wearables, healthcare IoT, Electronic Medical Records, mHealth etc.
- What does success look like for virtual care : Best practices from around the world
- Top 5 emerging opportunities for virtual care
- Why do virtual care fail : Gaps between the promise and reality of virtual care
