

Canada Health Infoway

Standards 101

**Health Information Exchange Standards
Virtual Mini-Conference**

Day-2 May19

Linda Parisien, SNOMED CT Manager
Canada Health Infoway

About Me

SNOMED CT Manager, National Release Centre, Canada Health Infoway

Background:

- Health Records Administrator
- Certified Terminology Standards Specialists (CTSS)
- Doing a Master of Industrial Engineering - Health Systems Engineering option
- Teaching Terminology standards, tooling and interoperability at University of Sherbrooke
- ICD-10-CA and CCI implementation in Quebec
- Translation coordination of SNOMED CT Canadian Edition
- Local, Regional, Provincial and pan-Canadian implementation experience
- Represent Canada on a number of International Work groups and Committees

Plan

- Who we are
- What services we offer
- The Health Terminologies Standards
- What it means in practice
- What is on the horizon
- How to get involved

Canada Health Infoway

About Infoway and The Health Standards Team

About Infoway

- Established in 2001
- Independent, not-for-profit corporation
- Equally accountable to 14 federal, provincial and territorial governments through the Members of the Corporation (f/p/t Deputy Ministers of Health)
- Independent Board of Directors appointed by the Members

Infoway's Mandate

- **National leadership** role in accelerating collective digital health efforts
- Ensuring a pan-Canadian **vision, strategy, architecture and plan**
- Ensuring **national standards** and common understandings about **privacy and security**

Who We Are

**WE MOBILIZE CANADA'S HEALTH CARE
STAKEHOLDERS TOWARDS A
REIMAGINED FUTURE.**

Vision

**Healthier Canadians through
innovative digital health solutions**

Mission

**Infoway will bring a pan-Canadian
focus to: improving the patient
experience, improving the health
of populations, and unlocking
value for the health system**

Infoway Focus

- PrescriberIT excellence and adoption
- Pan-Canadian interoperability across all F/P/T health systems
 - Availability of health data in a common format
 - Secure exchange of data in health care settings
 - Access to Canadians' health data in a digital, movable form

Our Partners and Collaborators

Governments

Provinces and territories

Health care organizations

Industry

Clinicians

Patients

Benefits from Infoway's Digital Health Investments

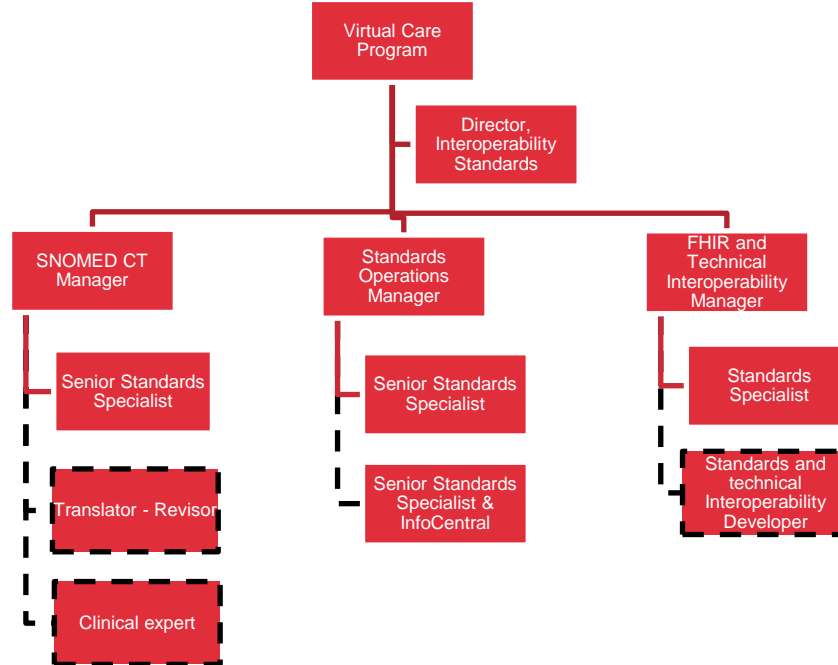

An estimated

\$43 billion in benefits since inception from Infoway's investments in:

connected health information (e.g., diagnostic imaging, drug and laboratory information systems), point-of-care systems (e.g., electronic medical records, telehealth) and virtual care (e.g., video and secure messages). An increase of **\$7.4 billion** in the past year.

SNOMED CT CA/ SNOMED CT

Infoway's [Standards Resources for COVID-19](#) contains regularly updated information on terminology changes in support of the Coronavirus outbreak.

SNOMED CT is the largest and most comprehensive clinical reference terminology in the world.

The SNOMED CT Canadian Edition* contains content that is specific to Canadian use contexts and is maintained by Canada Health Infoway. It is released in March and September of each year.

The International Release of SNOMED CT contains international content and is maintained by [SNOMED International](#) released on January 31 and July 31 of each year.

[Download Latest Releases](#)

pCLOCD/ LOINC

COVID-19 Surveillance: Single source for all SARS-CoV-2/COVID-19 LOINC content, includes both released and pre-release terms. Content is updated as new terms are created and pre-released.

Infoway's [Standards Resources for COVID-19](#) contains regularly updated information on terminology changes in support of the Coronavirus outbreak.

LOINC® is the largest reference terminology used for Laboratory and Clinical observations in Canada today. The pan-Canadian LOINC Observation Code Database (pCLOCD) is a Canadian constraint of the larger LOINC terminology and includes example pan-Canadian names for jurisdictional lab viewers and recommended units of measure for use in Canada.

pCLOCD releases contains codes that are specific to use in Canada and is maintained by Canada Health Infoway. It is released on March 31 and September 30 of each year.

 - Requests for Change and Implementation questions

Some 2021-2022 Canadian Interoperability Metrics

Health Terminology Standards

The image features a white background with abstract geometric shapes on the right side. A large, dark blue curved shape is positioned in the upper right, and a red triangular shape is located in the lower right, pointing towards the center. The text 'Health Terminology Standards' is written in a bold, black, sans-serif font on the left side of the image.

Pan-Canadian constraint of Laboratory LOINC

- Infoway: Canada's National Release Centre for pCLOCD (pan-Canadian LOINC Observation Code Database)
- Largest laboratory terminology in the world
- US English and Canadian French
- Recommended units of measure (UCUM)
- Release dates: January 31 and July 31 each year

pan-Canadian LOINC Observation Code Database Metrics

Pan-Canadian LOINC Observation Code Database
March 2022 Release

38,708 total records, including:
136 new records added in English and French
184 records modified in English and French

FHIR (Fast Healthcare Interoperability Resources)

What This Means In Practice

The background features a white field on the left and a dark blue field on the right, separated by a curved white boundary. A red triangular shape points from the bottom right towards the center of the page.

Standards Type In Interoperability

Lack of Interoperability

Poor communication

Inefficiencies

Duplicated efforts

Delays

Data Driven by Clinical Requirements

Maturity Level

SNOMED CT Maturity Framework

Implementation Level	
Level 5	Advanced Use
	SNOMED CT is recorded directly in the health records, and used as an ontology. Support for expressions, expression constraints (ECL) and the Machine Readable Concept Model (MRCM) may be provided.
Level 4	Semantic Network
	SNOMED CT is recorded directly in the health record, and used as a semantic network of relationships with simple ECL queries. All defining relationships may be traversed to support various system functions.
Level 3	Hierarchy
	SNOMED CT is recorded directly in the health record, and used as a hierarchy of codes to support various system functions.
Level 2	Simple Code System
	SNOMED CT is recorded directly in the health records, and used as a flat list of codes. Support for translated terms or multiple synonyms may also be provided.
Level 1	Mapping to SNOMED CT
	SNOMED CT is not recorded directly in the health record. SNOMED CT is used indirectly by mapping to SNOMED CT.
Level 0	Plans to Use SNOMED CT
	SNOMED CT is not yet used within the health record, but there are plans to do so. Clinical information is currently stored as free text or using local or vendor specific code systems.

The Journey

PrescribeIT® is Canada's national, not-for-profit e-prescribing service that provides safer and more effective medication management

- Electronic transmission of prescriptions electronically from EMR to the patient's pharmacy of choice
- Create Rx, Renew Rx, Rx Status (dispensed, cancelled etc)
- It is secure: it protects the patients' personal information from being sold or used for commercial activities

Fewer lost/damaged prescriptions

Improved medication safety

Decreased risk of privacy breaches due to fax transmission issues or unsecured email

Increased convenience and saved time and travel

Canadian Clinical Drug Data Set

- Canada Health Infoway partnered with Health Canada to create a computable and human readable drug data set that is now owned and managed by Health Canada.
- Allows systems to exchange drug data using common drug identifiers
- Supported by knowledge base vendors and clinical systems connected to PrescribeIT®
 - Making prescribing safer for patients
 - Making clinical workflows more efficient

Patient Summary-CA Specifications

What is it?

- The Pan-Canadian Patient Summary Interoperability Specification is an implementable, testable specification, based on the IHE International Patient Summary specification and HL7 IPS IG
- Defines building blocks (both: data model and interoperability) to create and share condition-independent and specialty-agnostic patient summaries

Content Data Model

Purpose

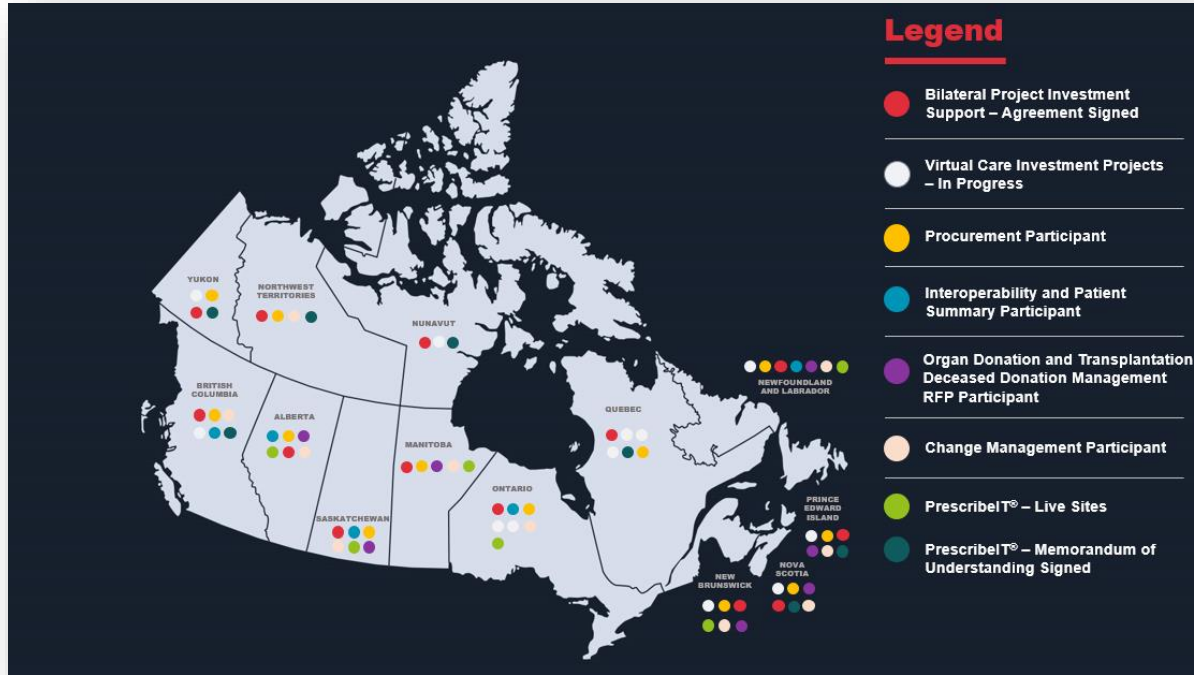

- Defines the Patient Summary-CA content data model and provides the required Implementation Guidance
- This section of the specification defines each data element, cardinality, data type, constraints, and code system references - all of the details needed for two systems to be semantically interoperable with each other

Standards

- SNOMED CT – CA Edition
- LOINC – pCLOCD
- panCanadian Valuesets
- Others

Canadian Implementations

Canada Health Infoway

What is on the Horizon

Virtual Care in Canada

- Strengthening Data and Information
- Health Standards Governance
- Partnerships
- Systems Integration and Collaboration
- Improve interoperability

STANDARDS NEWS

March 2022 Canadian Edition of SNOMED CT is Now Available

The [March 2022 Canadian Edition](#) (CA Edition) is harmonized with the SNOMED International February 2022 monthly release. Content includes COVID-19 vaccine related concepts, updated immunization concepts, new French translations, and new concepts requested by Canadian stakeholders to support diverse implementation projects across the country.
