

# School of Health Information Science

## Seminar:

# Computable Biomedical Knowledge to Enable Mass Action in Learning Health Systems

Speaker:

## Charles Friedman

PhD, Josiah Macy Jr. Professor of Medical Education Chair, Department of Learning Health Sciences, Medical School Director, Knowledge Systems Laboratory Professor of Information and Public Health, University of Michigan

**OCT 18 on Zoom**

**10:00AM PST**

We stand on the verge of a second knowledge revolution--the first being the introduction of the printing press--made possible by digital technology. This second revolution, achievable by creating a FAIR ecosystem of knowledge represented in machine executable forms, enables health improvement at scale through high-functioning learning health systems.
