

# School of Health Information Science

## Seminar:

# Practical Strategies for Creating Impactful Healthcare Dashboards

Speaker:

## Neel Majumder

MHI, MBA, CPHIMS-CA

Senior Leader – Digital Health Analytics & Product Management  
Provincial Digital Solutions, Provincial Health Services Authority

**June 5 on Zoom**

**12:00PM PT**

Have you struggled with dashboards that hold valuable insights but remain underutilized due to their complexity and lack of intuitiveness? This session will offer practical insights for transforming cluttered dashboards into powerful tools that drive decision-making and is ideal for health data enthusiasts and leaders. Drawing from our journey in developing the PHSA's Provincial Virtual Health Analytics Platform, this session will dive into the art and science of building effective dashboards and best practices around the dashboard development lifecycle. We'll discuss our journey from a fragmented landscape with disparate data sources and minimal governance to a unified platform capable of generating scalable insights through impactful data visualizations. Whether you're a data specialist or a leader, this session will help learn about some of the strategic and leadership competencies, governance & design principles needed to create and manage impactful healthcare dashboards.
