

Course Description

Understanding of International Relations

This introductory course covers International Relations theories and methods. It offers an overview of international activities, players, and politics at both state and local levels. By course completion, students will grasp fundamental IR theory, enabling them to analyze, critique, and apply these theories. The course also explores the possibilities and constraints of theory in understanding global politics.

Current issues on Korean Society I

This course is an introductory course on Korea designed for international students who are interested in exploring Korea from a variety of perspectives. Examining historical trajectories, cultural elements, and social affairs of Korea, the course attempts to enhance participants' general intellectual understanding on the contemporary Koreas.

Sports SCUBA diving and Understanding the aquatic environment

This course teaches students the theories and practical skills of skin diving and scuba diving. Upon completing the course, students will be able to understand and explore oceanic environments and ecosystems. The course includes lectures in the first week and hands-on training in basic swimming, skin diving, and scuba diving during the second and third weeks.

Understanding Korean Culture I

The course is aimed at increasing international students' understanding of Korea through the study of Korean culture and customs. Upon successful completion of this course, students will be able to comprehend the central cultural features of Korea, explain Korean culture to people around the world, and discover the similarities and differences between Korean culture and their own culture.

Sailing Yacht

This course is designed to provide students with an understanding of basic concepts in sailing. Students who successfully complete this course should be able to achieve knowledge of different types of knots and boats, and parts of a yacht as well as the history and theory of sailing. This course consists of lectures(1stweek) and practical training(2nd-3rd week).

DIY Model Shipbuilding

This course is a hands-on program designed to allow students to understand the basic principles of ship structure and to experience the process of designing and constructing model-scale ships. Throughout this course, students will learn about the main components and functions of ships, as well as the basic design method of ship. This course comprises theoretical lectures (1st weeks) and hands-on practical lectures where students build a model ship (2nd-3rd weeks).

Pukyong National University

offers the PKNU International Summer School(PKNU-ISS), an outstanding program that brings together students from all over the globe for a unique intercultural learning experience, providing invaluable exposure to Korean culture.

The objective of the PKNU-ISS program

goes beyond simply enabling students to earn academic credits. It is specifically designed to promote cultural activities by offering opportunities for students to explore and experience Korea, with a particular emphasis on the beautiful city of Busan. The PKNU-ISS program is a stimulating three-week program that combines professional development, interdisciplinary studies, and cross-cultural learning opportunities.
