

# WHAT IS EFFECTIVE SAFER SUPPLY FROM A SERVICE-USER PERSPECTIVE?

# We met with 63 people who use drugs and asked them to brainstorm, sort and rate the elements of effective safer supply.

Right dose  
and right  
drugs for me.

Safe, positive  
and welcoming  
spaces.

Safer supply and  
other services are  
accessible to me.

I can easily get  
my safer  
supply.

Helps me function  
and improves my  
quality of life (as  
defined by me).

I am treated  
with respect.

Thank you to all our concept mapping  
participants for their time and insight.
