scenarios

The safer bathrooms toolkit provides a repository of potentially useful documents to assist with communication, training, policy and protocol development, and design. They were developed in 2022 using experiential knowledge, lessons learned in practice, and existing resources. The usefulness of these documents and outcomes may vary depending on the setting. The team responsible for the toolkit's development does not accept legal liability or responsibility for the toolkit or any consequences arising from its use.

Developed with the support of
Michael Smith Health Research BC (Reach Program)

Single-Stall Bathroom

Pull Door (Preferable)

Notes:

All fixture heights, grab bars, door types should conform with local building bylaws.

Items shown pertain to the safer bathroom toolkit, there may be other required items in a bathroom that are not shown here.

Bathroom users should be consulted in design decisions.
