

Centre for Forest Biology, University of Victoria  
Material Request/Usage Information Form

To accommodate the users of the Growth Facility please provide the information requested below. This will allow the manager to allocate the appropriate amount of space for the users' equipment/supplies during the duration of the project.

### Cultural Requirements

- a) List the quantity, type and size of container(s). \*
- b) List the type(s) and quantity(s) of substrates.
- c) A list of other important materials required will also be helpful. \*\*

\* All containers must be clean prior to their use in the Growth Facility. Facilities exist in the "wet lab" to properly clean these containers and other utensils.

\*\* Please specify appropriate type and quantity. Special requirements for uncommon equipment or materials may delay the project starting date.

### Chemical Usage Guidelines

- a) List the name of each chemical and quantity to be held at the Growth Facility. Only bring the **amount of material that you plan to use** during the experiment. This is especially important with regards to all hazardous materials (ex. acids, bases).
- b) A current MSDS sheet for all hazardous materials (including fertilizers) is required **before** their arrival at the Growth Facility for temporary storage and use.

**Cultural/Chemical/Other Material**

**Request Form**

Item Description	Quantity

**Chemical Usage Inventory**

Item Description	Volume/Weight
