OBJECTIVES:

This course provides an overview of some of the issues in labour economics. We will expand on the basic models of labour supply and labour demand. However, the focus will be on a fairly in-depth analysis of a few topics, which may include immigration, discrimination, unions and unemployment. In addition to discussing the various theoretical models surrounding these topics we will also discuss the large empirical evidence that tests these models.

EVALUATION:

Evaluation in this course will consist of one midterm exam to be held in class, and a comprehensive final exam. In addition, there will be a course project, which will be described in detail during the first few weeks of class. Exams will be held according to the schedule listed below. The determination of your final grade for the course will be based on the mid-term test, which will account for 25%, the final exam will account for 50% and the remaining 25% will be allocated to the course project. All exams are required to pass the course.

EXAM SCHEDULE

Midterm Test: Friday, October 11th
