tstaneff@uvic.ca

Course Description:

This course will introduce students to the key theories of crime, deviance and social control. Students will learn about both classical and contemporary theoretical explanations of crime and deviant behaviour and how these theories are reflected in our current criminal justice system. We will cover a wide range of issues and case studies including race and crime, violence against women, crimes against animals, environmental crime, and crime in the media. By the end of the course, students will be able to identify the various theoretical approaches to crime and deviance, as well as critically analyze and evaluate these approaches in relation to contemporary sociological issues and understandings of criminality.
