

Hello!

My name is Anthony, I am a 4th year undergraduate student in the Music and Computer Science combined program, and I am running for one of the Student Representative positions on the University of Victoria Senate.

Throughout my undergrad I have been involved with several student-led initiatives and worked closely with members of my Department's Faculty to see them be implemented. Most recently I have served on the executive team of my program's Course Union, which has taught me the value of collaboration, as well as the joy that comes from being a part of positive change.

Given the opportunity of Student Representative I will be committed to:

- Examining and improving upon systems that are inefficient in their use of time and/or money.
- Increasing accountability in the university's role to communicate and listen to feedback from students at a departmental level.
- Pushing for proactive policies regarding AI's role in the university environment.
- Ensuring that inclusivity and sustainability are at the forefront of people's minds when discussing solutions to problems.

With the help from your vote, I hope to impact the decisions made this coming year in a way that will provide new reasons for why the University of Victoria is a great place to study.

Thank you for your consideration,  
Anthony Ryan
